

# The Alternative Soft-Tissue Graft

Geistlich Fibro-Gide® is ideally suited for soft-tissue augmentation around natural teeth and implants, as a submerged scaffold where an increase in soft-tissue thickness is clinically desired.

Additionally, Geistlich Fibro-Gide® is indicated for alveolar ridge reconstruction for prosthetic treatment and recession defects for root coverage.

## A Soft-Tissue Breakthrough that Delivers

- › Stable soft-tissue volume
- › Eliminates need for second surgical site
- › Reduces procedure time
- › Delivers treatment flexibility
- › Unlimited product supply
- › No special storage or preparation

**Geistlich Fibro-Gide®**  
is the first volume-stable  
collagen matrix, specifically  
designed for soft-tissue  
regeneration.

## Geistlich Fibro-Gide®

### Made of Collagen

A porcine, porous, resorbable and volume-stable collagen matrix.<sup>1</sup>

### Soft-Tissue Formation

The porous network of the matrix supports angiogenesis, formation of new connective tissue and stability of the collagen network in submerged healing situations.<sup>2,3</sup>

### Volume Stability

The reconstituted collagen undergoes **smart cross-linking** for volume stability of the matrix.<sup>1</sup>

### Soft-Tissue Integration

In vivo animal studies have shown ~ 97% remodeling of the collagen matrix after approximately 26 weeks.<sup>4</sup>

**Fibro-Gide.geistlich-na.com**

Baseline frontal view: missing central incisor. Implant visible through mucosa due to thin biotype.

6 month follow-up: final crown in place.

**“Avoiding a second surgical site reduces patient morbidity as well as my surgical time.”**

PD Dr. Daniel Thoma  
Zurich, Switzerland

**CAUTION:** Federal law restricts these devices to sale by or on the order of a dentist or physician.

#### Indications:

Geistlich Fibro-Gide® is indicated for soft-tissue augmentation:

- > Localized gingival augmentation to increase keratinized tissue (KT) around teeth and implants
- > Alveolar ridge reconstruction for prosthetic treatment
- > Recession defect for root coverage

#### Warnings:

As Geistlich Fibro-Gide® is a collagen product, allergic reactions may not be totally excluded. Possible complications which may occur with any surgery include swelling at the surgical site, flap sloughing, bleeding, dehiscence, hematoma, increased sensitivity and pain, redness and local inflammation.
